TUMBLE DRUMS

Tumble drums, engineered and fabricated in-house

Tweet Garot designs and fabricates rotary tumble drums around your product, batch size, and process requirements, supplied standalone or integrated into a process skid. Every drum is custom configured in diameter, length, and internal lifter configuration, with a choice of materials and finishes. In-house engineering and fabrication keep each drum easy to maintain and built for the line it runs on. Don't need customization, we have a standard version, too.

CUSTOM CONFIGURED

Diameter, length, and internal lifter configuration engineered to match your product and batch size.

STANDALONE OR SKID-BUILT

Fabricated as a standalone drum or fully integrated into a custom process skid.

304 STAINLESS BUILD

Solid stainless steel shell and trunnions, welded and finished in-house for washdown duty and long service life.

COMMON APPLICATIONS

- **Coating & Breading**
- **Marinating & Blending**
- **Process Skid Integration**

BUILT TO ORDER

Diameter, length, finish, and skid integration are sized to your application. Contact our team at foodbeverage@tweetgarot.com to configure a tumble drum for your line.

Line Card – Process & Fabrication

Conveying Systems

- Metal Detect / Inspection
- Incline & Transfer
- Accumulation Conveyors
- Washdown Duty Belts
